SUMMARY

8-year software engineer with expertise in code quality, automation, and monitoring, having worked across health insurance, health provider, and market research organizations.

EXPERIENCE

Qualifacts Credible EHR Systems

June 2023 – Present

Software Developer / Manager

Remote

- Reduced onboarding time for new team members by 80% by automating an 11-page setup manual with PowerShell scripts, cutting setup from 8 business days to 1.
- Delivered work spanning SQL scripts, UI/UX, JavaScript, APIs, and services within a large, multi-repo .NET environment.
- Refactored and rewrote 50% of the team's reusable code applying SOLID principles; conducted code reviews and mentored peers on parallelism and reactive programming.
- Developed tooling and set up AI CLI terminals to support a human-in-the-loop development methodology.
- Prepared the roadmap for the organization's migration to AWS, including code challenges and migration scripts.
- Hired a team of 4 senior software developers and took ownership of two ongoing projects, overseeing onboarding and mentoring to establish high coding standards.
- Reduced acceptance criteria and PRD rewrites by 60% by introducing Gherkin language, minimizing rework and delivery delays.

Tech stack: .NET Core, C#, Angular, Vanilla JS, Kendo, MSSQL, .NET MVC, Azure DevOps, AWS Lambda, SNS/SQS, .NET Standard 2.1, .NET Framework 4.7.2–4.8.1, Copilot, Claude, Codex

Tranzact

Feb 2021 – June 2023

Software Engineer (Team Lead), leading insurance broker in the US West Coast

Remote

- Led a team of 3 software engineers under Scrum, including technical evaluation of candidates and mentoring to strengthen team contribution from day one.
- Reduced on-premise infrastructure by 90% for a company-critical telephony/VoIP application by migrating to the cloud, maintaining 99.5% uptime with no P1 incidents and 100% feature backward compatibility.

Tech stack: .NET Core 5+, .NET Framework 4.7.2, Akka.NET, MSSQL, Azure, AWS Lambda, Splunk, Jaeger, AngularJS

SIDE PROJECTS

- The Chords — Chord progression generator with circle-of-fifths selector and visual chord diagrams.
github.com/elparaquecosadeque/the-chords
- Live Sound Calculator — Live sound tools for delay, wave phase, and sound speed calculations.
github.com/elparaquecosadeque/live-sound-calculator
- Blogging on tech: https://dev.to/gerardo_leon

SKILLS

- Technical: SOLID, Clean Code, AWS, JavaScript, Angular, C#, Functional Programming, Automation, Scrum
- Languages: English (Fluent, C1), French (Conversational), Portuguese (Conversational)

EDUCATION

USIL

2026

Bachelor's Degree, Business and Software Engineering

TECSUP**2019 – 2021***Professional Technician, Software Engineering — Thesis on distributed systems***CTAudio****2023***Technician, Live Sound***ISIL****2021***Technician, Business Management (Unconcluded)***OTHER ACTIVITIES**

- Pool and open water swimming
- Music playing
- Audiovisual production
